Plans, specifications and/or shop drawings for the installation of fire protection systems must indicate conformance to all local required codes. All fire suppression/detection systems must have plans reviewed and acceptance tests performed by the City of Bethany's approved third party. Completed applications must be accompanied by reviewer's plans approval documentation. Certificate of Occupancy will not be issued prior to acceptance test report provided by third party reviewer / inspector.

Submit completed application and approved plans review to: matthew.biswell@bethanyok.org

I hereby certify that this system will be installed in compliance with applicable adopted NFPA Standards and the current International Building Code and International Fire Code Adopted by the City of Bethany.
